## Summary

---

Innovative Software Developer with 2 years of experience designing, optimizing, and deploying scalable backend systems and full-stack applications. Proven success improving database performance by 90%, reducing system failures to less than 0.1%, and providing user-focused web and mobile solutions. Strong command of C++, JavaScript, SQL, and tools in the cloud. Detail-oriented and proactive engineer with a strong aptitude for algorithmic thinking, rapid learning, and delivering robust, maintainable code in agile environments.

## Education

---

**National Institute of Technology, Kurukshetra** — B.Tech, Mechanical Engineering Jul 2019 – Jun 2023  
CGPA: 9.1/10

## Experience

---

**Analyst, ICICI Bank** — Mumbai, India Jul 2023 – Present

- Developed a back-end infrastructure for credit card transactions and statements used by 5M+ customers across web and mobile banking platforms.
- Reduced transaction failures to 0.1% by redefining error handling workflows and improving end-to-end reliability.
- Enhanced database efficiency by 90% through query profiling, reindexing, and batch operation tuning.
- Automated configuration of reward points for 200+ products, reducing manual effort by 85%.
- Collaborated with regulatory teams to design RBI-compliant features, leveraging Oracle SQL to build secure back-end processes, enforce data validations, and support audit-ready reporting.
- Participated in candidate evaluations, interviewing 20+ applicants and mentoring new hires.

## Projects

---

**Placement Stats Website for NITKKR 2023** — [placementstatsnitkk2k23.netlify.app](https://placementstatsnitkk2k23.netlify.app)

- Scraped placement data for 10+ departments using Python (Selenium, Playwright) from Superset and institutional sources.
- Built a responsive site with HTML, CSS, Bootstrap, and JS; optimized for mobile and desktop.
- Designed an interactive dashboard in MS PowerBI to visualize placement trends; viewed by 1K+ users.

**iMusic Android App - Music Player** — [github.com/honey0632](https://github.com/honey0632)

- Built a music player app in Java using Android Studio with MediaPlayer and RecyclerView, supporting offline audio playback, playlist creation, and a responsive, user-friendly interface.
- Integrated Google AdMob for monetization via banner and interstitial ads; exceeded 500+ Play Store installs.

**ICICI ICCM System Upgrade**

- Revamped core banking modules using Oracle SQL, enabling on-demand generation of customized account statements and reduced statement processing time by 60% while serving over 10,000 daily active users.
- Consolidated over 200 credit card configuration schemas, reducing legacy dependencies by 40%.

## Technologies

---

**Languages:** C++, Java, JavaScript, SQL, Python

**Frameworks:** React.js, Node.js, Express.js, Android SDK,

**Tools & Platforms:** Git, Docker, Oracle SQL, PowerBI, Postman, AWS, AdMob, JIRA, Advanced Excel

## ExtraCurricular and Certifications

---

- **Google Data Analytics Professional Certificate**
- **AWS Fundamentals by Amazon Web Services**
- Solved 1200+ problems on [GeeksForGeeks](https://www.geeksforgeeks.org/) and [LeetCode](https://leetcode.com/).
- Led the academic project team, scoring a perfect 10 GPA.
