PROFESSIONAL SUMMARY

Innovative Software Developer with 3 years of experience designing, optimizing, and deploying scalable backend systems and applications. Skilled in distributed systems, event-driven architecture, and backend performance optimization, with working knowledge of Spring Boot, Relational Databases and various AI tools for developing scalable solutions

EDUCATION

National Institute of Technology, Kurukshetra
Bachelor of Technology(B.Tech)

Jul 2019 – Jun 2023
CGPA: 9.1/10

TECHNICAL SKILLS

Languages: C++ , Java, JavaScript, SQL, Python

Backend & Frameworks: Spring Boot, Hibernate, JPA, Node.js, Express.js, WebSockets, REST APIs, SOAP APIs

Frontend & Data: React, TypeScript, PostgreSQL

Devops & Cloud : Git, Docker, AWS(EC2, S3, ECS), Oracle Cloud (OCI)

Tools, Platforms & Automation: TSYS Prime, Oracle SQL, PowerBI, Postman, JIRA, Playwright, Google Gemini API

Core Concepts: OOP ,Data Structures, Algorithms, Event Driven Architecture

EXPERIENCE

Analyst (Manager-1), ICICI Bank — Mumbai, India

Jul 2023 – Present

- Developed a back-end infrastructure for credit card transactions and statements used by 5M+ customers across web and mobile banking platforms.
- Reduced transaction failures to 0. 1% by redefining error handling workflows and improving end-to-end reliability.
- Enhanced database efficiency by 90% through query profiling, reindexing, and batch operation tuning.
- Automated configuration of reward points for 200+ products, reducing manual effort by 85%.
- Collaborated with regulatory teams to design RBI-compliant features, leveraging Oracle SQL to build secure back-end processes, enforce data validations, and support audit-ready reporting.
- Participated in candidate evaluations, interviewing 20+ applicants and mentoring new hires.

PROJECTS

Naukri Auto Updater — Spring Boot, Playwright — github.com/honey0632/naukri-auto-updater-java

- Built a Spring Boot automation service using Playwright to execute scheduled daily profile refreshes on Naukri.com, improving profile freshness and recruiter visibility.
- Implemented headless browser workflows, configurable selectors, persisted session state, manual update and history REST endpoints, and containerized Oracle Cloud deployment with retry handling.

Job Matcher — Java, Spring Boot, React, PostgreSQL — jobmatcher.in — github.com/honey0632/Job-Matcher

- Built a Java 25 and Spring Boot 4.1 platform with React/TypeScript and Google Gemini AI for semantic resume-to-job scoring with keyword fallback.
- Designed multi-source JSON/XML/JSON-LD ingestion with location filtering, resume PDF/DOCX extraction, PostgreSQL 18 persistence, and Google OAuth.
- Added 35 JUnit 5 tests, GitHub Actions CI/CD to GHCR, multi-architecture Docker containers, and Oracle Cloud deployment with Caddy HTTPS.

Placement Stats Website for NITKKR 2023 — placementstatsnitkk2k23.netlify.app

- Scraped placement data for 10+ departments using Python (Selenium, Playwright) from Superset and institutional sources.
- Built a responsive site with HTML, CSS, Bootstrap, and JS; optimized for mobile and desktop.
- Designed an interactive dashboard in MS PowerBI to visualize placement trends; viewed by 1K+ users.

CERTIFICATIONS

- IBM Full Stack Software Developer Professional Certificate
- Google Data Analytics Professional Certificate
- AWS Fundamentals Specialization Certificate
- Solved 1200+ Problems — LeetCode and GFG
